 Not pictured: Dawn Holm

Sentara Vascular Specialists is a Division of Sentara Medical Group, with access to patients throughout the State of Virginia. We have a long history of research, being affiliated with the local medical school and a large pool of physicians who perform endovascular procedures. The clinical research staff consists of three research coordinators and a research assistant. Potential subjects are screened by regular review of patient appointments, hospital admissions and discussions with physicians about upcoming cases.

The secret to our success? Having engaged physicians and PA’s on the lookout for potential subjects, as well as having a team of coordinators who are able to see the patient in the hospital or office on short notice. With many locations, this can be somewhat challenging, but the three coordinators trained on the study helps a great deal. Teamwork is essential!

Enrollment Leaderboard

Sites*

- A: 1160 – Keck/ USC
- B: 1258 - Boston MC.
